## SUMMARY

Cybersecurity professional with hands-on training from Jordan's National Cybersecurity Center and practical experience in secure application development, risk assessment, and cybersecurity awareness. CompTIA Security+ certified, with a solid foundation in networking (CCNA), Linux systems, and security frameworks. Actively engaged in building inclusive and secure digital environments through technical projects, volunteer work supporting students with disabilities, and technology journalism covering national cybersecurity events. Motivated to contribute to real-world cybersecurity operations and continuous learning environments.

## TECHNICAL SKILLS

**Security & GRC:** Risk Assessment, Secure Coding Practices, Access Control, Security Framework Awareness

**Networking:** TCP/IP, VLANs, Firewalls, VPNs

**Systems:** Linux (Ubuntu, Kali), Windows

**Programming, Development & Databases:** Python, C++, JavaScript, SQL

**Languages:** Arabic (Native), English (Professional working proficiency)

## CERTIFICATIONS

- CompTIA Security+ — CompTIA
- Advanced GRC Course — Green Circle (Youth Grow Activity, U.S.-funded)
- Masar Training Program — National Cybersecurity Center, Jordan
- CCNA Certification — Cisco
- Linux 101 Certificate
- SUMO Robotics Workshop — Embedded Systems & Robotics Logic
- Training Certificate in Governance, Risk, and Compliance (GRC) Track
- Active Defense: The New Frontier in Cybersecurity

## RELEVANT EXPERIENCE

**Correlation One** **Remote**

*Cyber Advance for Women in MENA* *June 2025 - November 2025*

- Participated in a competitive 22-week training program covering IT fundamentals, operating systems, networking, security controls, threat analysis, incident response, and risk management
- Gained hands-on experience through 16 labs and projects on topics including network troubleshooting, digital forensics, access control, cryptography (OpenSSL), MITRE ATT&CK framework, and vulnerability assessment
- Applied knowledge to 17 real-world case studies addressing security architecture, enterprise threat mitigation, and regulatory compliance

## PROJECTS

**Risk Management Web Application**

- Full-stack Python & SQL application for identifying and mitigating cybersecurity risks
- Implemented user roles, scoring algorithms, and NIST-aligned reporting
- Designed to support structured risk evaluation and mitigation tracking

**Telegram Cybersecurity Quiz Bot**

- Python-based bot generating cybersecurity quizzes via API integration
- Deployed on Linux with secure authentication and rate-limiting controls

**Android Cybersecurity Quiz App**

- Native Android application with SQLite storage
- Applied secure coding practices and local data protection

**Portfolio Websites**

- Responsive HTML, CSS, and JavaScript websites showcasing academic and technical projects
- Implemented basic security measures and clean UI/UX practices

## EDUCATION

**Al-Balqa Applied University** **Jordan**
*B.Sc. in Cybersecurity* *2026*
